Subject : Certificate of non-GM plant in Thailand

The Ministry of Agriculture and Cooperatives issued the Ministerial Notification B.E. 2543 (2000) under the Plant Quarantine Act B.E. 2507 amended (No.2) B.E. 2542 specifies listed genetically modified organisms (GMOs) as prohibited materials. The importation of the GMOs into Thailand is prohibited unless for research purpose that requires an import permit issued by the Department of Agriculture. Conduction of biosafety and risk assessment of the GMOs is under close supervision of the Department of Agriculture.

With the government policy not allowing the importation and commercial production of any genetically modified crop, coupled with strict enforcement of the Plant Quarantine Act, plant materials grown in the country are not genetically modified. The Department of Agriculture, therefore, certifies that **rice (*Oryza sativa*)**, **Thai Hom Mali rice** grown in Thailand is not genetically modified.

Yours sincerely,
